Aspiring Computer and Communications Engineer, with hands-on experience in embedded systems, software development, and IT support. Demonstrated ability to design and deliver real-world solutions, combining hardware expertise with strong programming fundamentals.

EDUCATION

BS in Computer and Communications Engineering | *American University of Science and Technology (AUST), Zahle, Lebanon*
2023 – June 2026

- Graduating with Honors
- Relevant Coursework: Embedded Systems, Digital Systems, Signal Processing, Electronics, Control Systems

WORK EXPERIENCE

Software & Data Engineering Intern | *MelRok LLC, California, USA (Remote)* June – August 2025

- Developed Python pipelines for energy meter time-series analysis, automating load calculations and processing workflows — reducing manual effort across multi-device datasets
- Gained hands-on experience with BACnet/Modbus protocols, IoT gateways, device discovery, and data integration in a live energy-monitoring environment

IT Support & Engineering Labs Assistant | *AUST, Zahle, Lebanon* February 2023 – Present

- Provided technical support for hardware, software, and network connectivity issues, maintaining consistent lab availability for over 100 students
- Assisted 20+ students in electrical and electronics labs with hands-on guidance on circuits, oscilloscopes, PCB prototyping, and digital systems

PROJECTS

PID Ball & Plate Control System December 2025

- Developed a closed-loop control system to stabilize a ball on a tilting plate using a Raspberry Pi 4 and a 3-servo triangular actuator
- Integrated real-time computer vision (OpenCV) achieving 100 FPS ball tracking with a custom-tuned PID algorithm

SunGuide — Dual-Axis Solar Tracking System May 2024

- Designed a dual-axis solar tracking system using Arduino, LDR sensors, and servo motors to continuously align solar panels with the sun's position
- Improved energy efficiency over fixed-panel installations with real-time adaptation across varying environmental conditions

SKILLS

CAD / Simulation: Proteus, NI Multisim, LTSpice, CircuitMaker, EasySoft Moeller (PLC), TinkerCAD

Programming & Analysis: Python, C++, Java, MATLAB, Simulink, SQL, Arduino IDE, Assembly, Ladder Logic

Soft Skills: Technical problem-solving, Productive Under Pressure, Written and Verbal communication, Attention to Detail

Languages: Arabic (Native), English (Professional), German (Limited)
